

Tom O'Connor vs. Irish Coursing Club, 1998.

Dr. Halverson worked with Pat Dalton, a prominent breeder of racing greyhounds, to vindicate Tom O'Connor of misrepresentation in the registration of a litter of puppies. In 1993, Serology Ltd., the Club's DNA testing laboratory, had purported that one puppy in the litter was excluded to the dam. DNA testing by four other laboratories worldwide, including Zoogen, Inc. had found no evidence of exclusion. Dr. Halverson testified at the 1998 hearing. Serology LTD was found to be in error. Tom O'Connor was awarded substantial financial compensation.

Office of the Prosecuting Attorney of King County Washington, 1998. The State Vs. Leulualahi (97-C-08256-9) and State vs. Tuilefano (97-C-01391-3) for the murder of Jay Johnson and Raquel Rivera. Dr. Halverson worked with Prosecuting Attorney Tim Bradshaw and Detective Kenneth O'Keefe on a double homicide case. STR profiles from bloodstains found on the clothing of the suspects could not be excluded to the victim's dog. Dr. Halverson provided analysis and expert witness testimony. Both suspects were convicted. This was the first trial using canine DNA evidence in the United States.

Royal Canadian Mounted Police Detachment File Number 91-0693 (reference: Schraeder, Daniel Fred-Murder of), 1996-1997.

Dr. Halverson and colleague Eric Johnston worked with Dr. Gary Shutler of the RCMP Forensic Laboratory in Winnipeg, Manitoba. Forensic samples of mixed canine/human bloodstains from a 1991 unresolved homicide case were analyzed. STR profiles from the non-human blood on the suspect's jeans could not be excluded to the victim's dog. The evidence was used by the Canadian Royal Counsel to assign murder charges against the primary suspect. In September 1997, the suspect filed a guilty plea.

Forensics Fee Schedule

DNA extraction from hair(s) in packets or on tape lifts.....	\$50/hair
DNA extraction from hair(s) mounted on microscope slides.....	\$100/hair
DNA extraction from blood/buccal swabs/tissues.....	\$50-\$100/sample
Preliminary lab assessment* (STR amplification).....	\$150/sample
Preliminary lab assessment* (Mitochondrial amplification).....	\$250/sample
Finished analysis (STR analysis)	\$150/sample
Finished analysis (mitochondrial sequencing)	\$250/sample
Computer analysis/database comparisons.....	\$200/hour
Preparation of documentation (hard copy or electronic).....	\$100/hour
Population Studies (samples provided by client).....	(to be arranged.)
Telephone consultation after case submission.....	\$100/hour
Expert Witness Fees.....	\$1000/day (8AM-5PM)+ expenses
Depositions, Site Visits	\$200/hour + expenses
Witness Standby.....	(8AM-5PM) \$50/hour
Travel (travel occurring 8AM-10PM PST).....	\$50/hour
Travel (travel occurring 10PM-8AM PST).....	\$200/hour

* An assessment to determine whether a sample yields a DNA product for further analysis.

An invoice will be forwarded upon completion of work performed. Terms are net 30 days. **A QuestGen submission form with a purchase order or credit card number is required prior to processing samples.**

 Date received : 2-27-76
 Time received : 12:55 PM
 Nature of exam : Fibers, Hair
 Date reported : 3-8-76

 Report to: Chief of Police, Southfield Police Department, 26000 Evergreen Rd.,
 Southfield, Michigan 48075
 Attn: Det. Mel Paunovich

Reference:

Homicide

Victim:

MARK STEBBINS

Suspect:

NONE

Evidence Received:

- #29. Debris recovered from 1965 Pontiac.
- #33 and #34. Sweepings from 1965 Chevrolet.

Additional evidence reportedly placed in locker #3 on 3-1-76 at 11:15 AM by Det. Paunovich.

Evidence removed from locker #3 on 3-1-76 at 12:30 PM by Charlotte L. Day.

- #25. Tan plastic bag containing white T-shirt and maroon sweat shirt worn by victim.
- #26. Tan plastic bag containing white jockey shorts worn by victim.
- #27. Tan plastic bag containing socks worn by victim.
- #28. Fibers from blanket used to cover victim.

Results:

No trace evidence was found in the debris from the Pontiac or Chevrolet that could be shown to have significance at this time.
