My [REDACTED] the GM executives and other affluent men like Dick Chrysler of Cars and Concepts at the time. There was a highly organized underground child pornography cult in the Oakland area in 1976. The children were taken to the house of the personal accountant and "primed" for filming. We were passed around various "babysitters" to prep us for movies in secrecy. Several of the boys were so brutally sodomized they were hospitalized. Many did not survive. What your blogger that grew up in Detroit is saying is probably true. I was there and I only survived [REDACTED]

[REDACTED] One of the first responders at the scene, a family friend, came to warn us of what the GM employer's son had done and the writing across the windshield of the car, "The Devil made me do it."

I tried to tell local law enforcement for investigative purposes. Law enforcement has not replied to my calls only informed me they were "very busy." My God we played with the same dogs during filming and I know the massive storage shed out back is covered in our DNA. The movies were collected and transported in VHS Scooby Doo cases by the box loads, I assume for production and/or distribution. Much of the evidence was burned around 1978 and it was VERY important we were all kept immaculate. I have considered reaching out to your dad many times, but I am afraid. I have photo albums of myself "interviewing" unclothed with strange children I can only assume were also involved. I remember my "training" no matter how I try to forget. I also remember a tall long haired brunette girl in a white eyelet ankle length dress with a red sash sparing me from a filming session once. I never saw her again. I have the names of everyone mentioned above with the exception of the eyelet angel that probably saved my life.

I was one of the children that lived. I know the house layout and previous owner, the names of a few responsible dead and still living and their new name/location, another survivor in hiding, and the type of dogs we all played with. These are very powerful men and I fear for my and my children's safety. Trust no one. Not even the parents....
