SOUTHFIELD POLICE DEPT. 26000 Evergreen, Southfield, MI 48076 NARRATIVE REPORT Phonr: 248-354-4720 ORI # MI6375100 SUPPRESS ☐ PRIMARY ☐ SUPP PAGE PLAT BADGE 2 BADGE 1 INCIDENT STATUS CRIME CLASS INCIDENT # ☐ CLR ARREST ☐ UNF 03 DETECTIVE BUREAU FOLLOW-UP 04 The MSP Lansing Crime Lab held a meeting on March 21, 2003, regarding this case. The 05 meeting was arranged by D/Sgt Michelle Glasgow, Latent Fingerprint Unit, (TX: 517-322-6664). Charles Barna, MSP Unit Supervisor/DNA Coordinator of the Lansing Lab, 06 conducted the meeting. Attending were certain investigators from jurisdictions involved in the Oakland County Child Killer cases, including Sgt Dave Wertz, OCSD Oakforce. Also attending were representatives of MSP DNA Lab and MSP D/Sgt Terry Young, 80 (TX: 517-336-6490). D/Sgt Young is coordinating further investigation of the Oakland County Child Killer incidents. Focus of the present investigation is to find DNA evidence 09 that might ultimately identify the perpetrator. 10 The purpose of this particular meeting was to discuss the Mark Stebbins case and 11 determine how the DNA Lab might best proceed with finding for extraction and analysis, DNA evidence from the physical evidence in MSP custody or, any additional physical 12 evidence in the custody of the local jurisdiction(s). In an effort to be methodical, the Lab is addressing each case in chronological order. The Stebbins case represents the first 13 known offense in the series of murders attributed to the same perpetrator. Reported to MSP is the fact that our records indicate SPD no longer holds any physical evidence. All that is known to exist, MSP already has. Clarifications, as currently understood, were offered regarding scene photos, diagrams and certain information about 16 the Stebbins family. (It should be noted that apparently, SPD has the only known photo of a "deer hoof" shaped wound on the top of Stebbins' head). 17 18 MSP has asked SPD to collect DNA samples from SPD Lab personnel and others who may have handled Stebbins body. The DNA would be used for process of elimination. An 19 examination of reports, photos and rosters will be necessary to compile a list of those persons. However, cursory review of the file suggests that now retired Officers Melvin 20 Paunovich, and Duane Szumlinski, as well as the late Robert Collins, may have handled the body. It is believed these officers were assigned to the lab in 1976 and therefore, possibly involved in removing the body from the scene, transporting it to SPD's security garage and collecting the clothes and shoes before the OCME took official custody. 23 MSP intends to hold additional meetings and SPD attendance is anticipated. SPD cooperation with this new effort to solve the Stebbins case, if not all related cases, could 24 be critical to success. 25 26 An MSP outline of the Stebbins case accompanies this report. 29

NEWS RELEASE

For Immediate Release

Both Southfield and Ferndale Police Departments are still actively working on the murder of 12-year-old Mark Stebbins, of Ferndale. Officials of both Departments, working jointly, have been following up a series of leads in the four-month-old murder.

On Sunday, February 15, 1976, Mark was last seen leaving an American Legion Hall in Ferndale to walk to his home nearby. His body was found in the rear of a Southfield office building parking lot on February 19.

An autopsy performed on the body revealed that the young boy had been the victim of a vicious sexual assault. The autopsy revealed that Mark Stebbins died from asphyxia due to smothering. There were marks on his arms, legs and neck, indicating that he had been tied up for an extended period of time.

Chief Donald Geary of the Ferndale Police Department stated, "Our investigation into this senseless killing of a young boy has not diminished one bit. This Department, along with the complete cooperation and tireless efforts of the Southfield Police Department, followed up hundreds of leads and interviewed a long list of potential witnesses. We will not give up our search for the killer, or killers, of Mark Stebbins!"

Southfield Police Chief Milton G. Sackett added, "I cannot help but believe that someone who hasn't come forward as yet knows, or saw something, that would aid in the solving of this brutal crime. The person or persons responsible must be either very mentally ill, or devout sadists. Both Chief Geary and I want to say we will protect the confidentiality of anyone who may have any knowledge that would assist in the solving of this vicious crime.

"Anyone may call either Chief Geary or myself at any time of the day or night, with any information on this case."

The Detroit News Secret Witness Program is offering a \$5,000 reward for information leading to the arrest and conviction of the killer or killers.

Anyone with any information at all, no matter how insignificant it may seem, is asked to call the Southfield Police Department at 354-4720, or the Ferndale Police Department at 541-3650.

This News Release was issued by Authority of Southfield Police Chief Milton G. Sackett and Ferndale Police Chief Donald Geary through News Information Representative Alton L. Brown.

- 1. No witnesses to the abduction.
- 2. Unknown at what area he was abducted.
- 3. No witnesses when the body was dropped.
- 4. Red fibers (Items #14 and #20) were found on his blue jeans and right boot. These were later found to have come from the carpet of the American Legion Hall where he was last seen.
 - 5. White fur was found on jacket of Mark. This was identified as animal hair (Unknown what type of animal (Item #17).
 - 6. Bright blue paint found on Mark's right boot (Item #18).
 - 7. Injury to head of Mark that looked like a hoof print of a deer. It was a superficial wound.
 - 8. No blood in hair or clothes from above injury, indicating clothes and hair had been washed.
- 9. There were bind marks on victim's wrists and possibly on his ankles.
- 10. Prayer card found the day of the funeral, at the scene where Mark's body was dropped. Unable to raise fingerprints from card (Item #22).

- #1 Dirt from parking lot near body. Debris contains broken glass, small stones, soil and tobacco fragments. Nothing of known significance was found.
- #2 Dirt from under body. This debris consists primarily of vegetation presumably native to the area and is not unique in character. Blue wool fibers similar to those from the blanket used to cover the body (#15) are present.
- #3 Dirt found near body. This debris contains common vegetation, soil; broken glass, white rodent hairs, black rodent hairs and one human head hair approximately 3 inches in length, wavy and brown in color. No other hairs were found in other submitted items that correspond to this hair and its presence is not likely to be significant.
- #4 Small hand towel. No blood stains or characteristic fibers or hairs were found.
- #5 Blue parka with hood. This jacket shows normal soiling from wear on both the outer surfaces and inside neck area. Blood stains are present on the hooded portion.
- Blue jeans. The jeans are in good clean condition with the #6 exception of stained areas on the right rear and right leg. It seems probable that this is a mixture of dirt and oil from the parking lot where the body was found. Trace evidence includes red fibers that correspond to known red fibers from the American Legion Hall, white wool, red wool, two short yellow synthetic fibers, one yellow/gold synthetic fiber, blue wool, one human head hair 2 3/4 inches long, rodent hairs and dog hairs. The trace evidence is of questionable value. Rodent hairs are not only common and of wide distribution but are known to be present at the site where the body was found. The dog hairs are very similar to dog hairs on the blanket used to cover the body and certainly this is a possible source of the hairs on the clothing, especially since relatively few were found. White wool fibers are common and many are present on the blanket. This blanket is also the probable source of the blue wool and may very well be the source of any of the foreign fibers and hairs recovered from the clothing.
- #7 Black belt. This was intact and in the normal position on the jeans.
- #8 Black rubber boots. The upper portion of the boots is clean with soil present on the soles. A small smear of blue paint is present on the left boot. This has the characteristics of a decorative type paint and its origin is as yet unaccounted for. The location and small amount do not suggest a highly probative value.

- #10 The socks show normal wear since washing as indicated by both their appearance and body odor.
- #11 Underpants. Urine and fecal stains are present. The condition of the underpants (disregarding the fecal and urine stains) is consistent with their having been worn for a relatively extended period of time. No semen was found.
- #12 T-shirt. The T-shirt is soiled and suggests considerable wear since washing. Both the stained and soiled appearance and the presence of perspiration odor support this contention. Blood stains are present.
- #13 'Red sweat shirt. The sweat shirt, like the jeans, is clean, in contrast to the undergarments. No body odor or significant staining is present. There is a small amount of blood present at the neck.

It is unfortunate that the dirt and debris samples from the parking lot and the blanket used to cover the body were not made available to the Laboratory until May, 1977. It would have been particularly useful to know that a dirty blanket had been used to cover the body and that this blanket is a probable source of trace evidence present on the clothing.

FURTHER DETAILS OF COMPLAINT

On 8-11-75 at approximately 6:00 PM the assigned officers received information the a runaway subject named Gregory Frances Fedderson, dob was at 3300 Horton. The assigned officers setup a surveillance at the 3300 Horton house and at approximately 6:15 PM Gregory and a Faith Rose Scott of 3300 Horton came out of the house and walked North on Horton. Shortly befor Ten Mile Road a Blk/Green Oldsmobile, 75 Mich TPW-934 pulled into the church parking lot on the corner and Gene Smith got out and started talking to Gregory. Both Gregory and Faith got into the rear seat of the vehicle and Smith got into the front. The vehicle was followed into Royal Oak until a uniform car could pull over the vehicle. The vehicle was stopped at 1025 Fifth, Royal Oak.

The driver of the vehicle was a Edward Steve Ellis, dob of 1007 Fifth, Royal Oak.

Ellis was advised of Fedderson being a runaway and he stated, "Yes I know he is". Ellis stated that Fedderson was a friend of Smiths and that Smith knew all; about fedderson and he didn't

care about that.

On August 2, 1975 Smith had contact with the Northville police dept. about Fedderson because Smith stated that he and Fedderson were in the Northville area on the second and Fedderson took his car. Fedderson was later stopped for drunk driving in Smith's car but escaped from the police vehicle. Smith was advised at that time by the officers that Federson was an escapee juvenile.

the young boys in there and molest them. She states he would	d pick out a boy that had no
father around and act like a big brother to him. He would be	uy him things and take them
places. Informant states she saw Stebbins picture and that h	ne looked like the type her
husband would go after. He made the statement to her that "	ne is afraid when he gets older
he won't have the energy to make the young boy happy and if	they reject him, he might hurt
them." She states he usually turns them on to marijuana and	alcohol. Suspect went to
Lincoln High School in Ferndale and graduated in 1956. She h	nas been divorced from him

He was hesitant in asking the questions. He said he just wanted to get a little information about a murder that happened 'I think in Bloomfield Hills about six months or more ago.''

I covered the SDDDDSSheila Srock murder for the paper so am fam-

He said 'really.'

I asked him why he panwanted to know.

He said he really showouldn't bappadahave called or be talking appropriate it because he didn't want to get anyone in trouble.

I admivised him, as I did repeatedly throughput the conversation to call Lt. Kalbfleisch in Birmingham. He said no he didn't think he would, but he took the number down after looking all over the place for a pen or pencil that would write.

Finally he said, "Well I'll tell you the truth. I think my best

I asked him why he though that.

He said ''I don't want to say any mor'e about it.'

I asked him where he was calling from.

He said Detroit.

I asked him why he called the Eccentric.

He spasaid because he thought it happened out our way.

He seemed to thingk, but not be sure, if there was a drawing of the suspect in the paper.

I said DastDatayes there was.

He said ''Did someone see him?''

I said 'Yes.'

He said really. ''I'd like to see that. Maybe I can just look

at it and know it wasn't mmmpmy friend.''

Again I suggested he call Kalbfleisch or stop in any police depart ment and when n would be able to look at the drawing.

He said, ''I proposed by the said.

I kept asking him why he suspected his friend (whom he said had been his been been his been been his b

He also said, maybe not in immediate sequence that "Well, I'll bebytell you this made much. The police picked him up after this murder and questioned him, but they let him go. It doesn't seem reasonable that they'd let him go it he did it, does it?' he ased me.

He continued to explain that his friend's ex-wife was the one whood called the police about him 'and she probably just did it out of spite,' he said.

I asked be been him what police proquestioned his friend. He said it was the Michigan State Police.

Another statement he made to me and one I wrote down at the time I was talking with him was 'It's manot that I have a company of the statement of the statement

Do''Thanks. I'll do that Alice,'' he said. "'My name's Mike.'

The conversation lasted for about one half hour and because I was on deadline I jout couldn't talk with him any longer. However, I think he might have poppone on talking for some time.

There were several others in the newsroom at the time, I indicated to them what the case was, they tried unsuccessfully to have the call traced. They got the Birmingham Police on the phone and they said they would send someone PDDDDDD over to talk with me.

after a couple management calls from me to Kalbfleisch, he returned one, but sadd he management got the message. I told him that I felt it was an important call, however, make did not follo through any further.

What I really felt about the subject who called me was that I might be talking with the killer. I felt he was not talking about a friend but about himself and that maybe he really didn't know

whether he did it or not and was patrying to find out.

Undersigned officer on reviewing tip 18 and 68, contacted Ithaca, New York Police Department, TX 1-607-272-3245 and they report \underline{no} similar homicides in their area.

Rochester, New York Police Department was contacted at TX 1-716-428-7157 or 7158 and a Lou Camponozzi reports that they had possibly three similar murders:

November 16, 1971 April 2, 1973 November 26, 1973

One on April 11, 1976 but they don't believe it was connected. Lou further reports that the victims were ages 10, 10, and 11, that they were abducted between 4 and 6 p.m. in the city area, raped, washed, and redressed then left on the side of the road 3 or 4 days later in rural areas around Rochester.

Investigator Longhaney, New York State Police, Herietta Sub-Barracks, 1-716-271-4646 is handling the case. Dr. Edland, 1-716-271-3434 is the medical examiner.

' The M.E. report states that all three were Oliga Spermia, extremely low sperm counts and non-secretors but this could be attributed to cold, old sperm and other factors.

Lou further reports that they have a partial palm print off one body from the ball of the hand near the thumb base. This was lifted by Bud Hines from Toronto useing the iodine plate process he used in our take force case.

Other similar factors in New York cases:

All Catholic

All enroute to or from a store

All, strangled

All found along a highway in plain view

All from low income families

All from broken homes

Officer Lourn Doan and the undersigned then interviewed our sources (see Doans report) and on returning: Called Cambridge, Massachusetts Police Dept. 1-617-868-3400 and Officer Carboni suggested that we call back after 9:00 a.m. The reason for calling Cambridge was to see if our suspect on Tip #18 who attended Tufts University at Harvard may have been arrested or they may have had similar murders.

2-10-77 '8:10 a.m.

Dennis Raleigh at Master Charge was requested to do a work up on all of the suspects charges since 1971 with special attention to motels and gas purchases. 8:45 a.m.

Ithica New York Police Department was contacted and Det. Tucker TX 1-607-272-3245 reports that he will call Cornell and try to acquire his scholastic background from 1971 to the present.

Lt. R. Jerry Simmons

2-10-77 TASK FORCE REPORT Tip 18 & 68

9:45 a.m.

Talked to Senior Investigator Edward Longhaney, New York State Police and he was advised that we were trying to establish our suspects location in 1971 through 1973 and would get back to him at 4:00 p.m. He will start a complete New York check on our suspect.

10:15 a.m.

No record at Master Charge. A source at Bank Americard is running a check for us and will get back to us.

1:00 p.m.

Det. Tucker, Ithica, New York reports on school records that Nichols says his car is in his aunts name, Ethel Nichols. He is in the Regional Planning Department at Cornell University.

1971-73 Attended Tufts University in Medford, Massachusetts

1970-71 Did a summer research project at Princeton University located between Trenton and Elizabeth, New Jersey

1963-70 Oakland University, Rochester, Michigan

Questions to be answered:

- 1. Did he stay at motel's in Rochester area in 71-73 while traveling to Medford, Massachusetts?
- 2. Is there similar murders in Massachusetts or New Jersey?

1:15 p.m.
